OFFICIAL DRAWING GUIDE

Dear Clark,

Within these sacred pages you shall find the many secrets to the art of Alex Clark.

At first glance, many think that the art of Clark is simplistic in nature. Do not let its basic shapes fool you. Drawing these characters is even easier than you may guess. It's actually dumb stupid simple.

Over the next several pages of this ancient manuscript (or eBook depending on which version you purchased) we shall break down into 4 steps our tricks for drawing the most notable characters in the Alex Clark Cinematic Universe.

But remember, with great power comes great responsibility.

Once your tutorials are complete, you shall be one of the few that possess the power to create your own knock-off franchise. It is up to you, the sacred holder of our drawing secrets, to use your powers for good, and only draw Alex Clark characters for emotionally charged fanfics.

If you have made it this far I believe you are ready for the challenges that lie ahead. Very few have the tenacity and strength to read even this much text in one sitting and yet here you are; a legend in the making.

On the next page is your first challenge. While it may seem miniscule, it is the most important step. Do not skip it.

Draw on. May our legacy continue with you.

A stylized, handwritten signature of the name "Alex" in black ink. The letters are connected and have a fluid, cursive-like quality.

CHALLENGE 1

Before drawing, you must center your inner artist:

Eat some cake and take a 2 hour nap.
